

## Milestone 8: Final report

### 1. Final Project Report

The final project report should be submitted in **pdf** format and consist of the following components:

#### 1. Final Design Report

1. Cover page, include team name, architecture name (if any), team number and names of all team-members;
2. Table of contents, include section and sub-section numbers with page numbers;
3. Executive summary;
4. Introduction;
5. Body, summarize and discuss your instruction set design, your implementation, your Xilinx model, your testing methodology, and your final results including the performance data collected in Milestone 6;
6. Conclusion; and,
7. Appendices, include your complete design documentation, design process journal, and test results.

Your final design report should be placed in the **FinalReport** directory of your team's repository.
